ACM Email Room
Participant PC Setup

1. Write down all your current settings in the spaces below. You will need this information when you go home.
2. On the start menu, proceed to Settings and select Control Panel. Select the Network icon.
3. Under Protocols, select TCP/IP and click on the Properties button.
4. Using the table below, select the tabs and change the information after recording your present settings.

Tab	**Instructions**	**Number**	**Original**	**ACM**
IP	Insert IP address	IP	___.___.___.___	132.236.46.___
IP	Insert subnet mask	Subnet mask	___.___.___.___	255.255.255.0
Gateway	Remove installed gateways and insert ACM gateway	Gateway	___.___.___.___	132.236.46.1
DNS	Enable DNS and add ACM name servers	DNS servers	___.___.___.___ ___.___.___.___ ___.___.___.___ ___.___.___.___	128.84.242.46 128.35.82.50

5. After entering the ACM settings, click OK. If you are instructed to reboot your computer, do so. Keep these settings for the duration of the conference.
6. You may now plug into the ACM net on any available cable in the email room. The room is open from 8 AM to 6:30 PM each day.
